

RECEIVED

JUN 25 2001

REMARKS

By the present amendment, Applicant has added claim 58. Claims 1-58 remain under consideration. Claims 1, 23, 41, and 58 are independent claims.

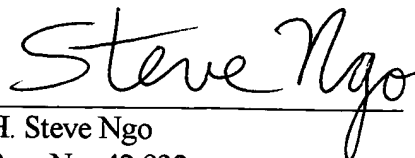

Claims 1-22 read upon Group I, namely the embodiments of Figures 1-14. Claims 23-57 read upon Group II, namely the embodiments of Figures 15-57. Regarding the restriction requirement, Applicant hereby elects the claims of Group II, namely the embodiments of Figures 15-57 drawn to a gravity-sensitive latch, with traverse.

Applicant traverses the restriction requirement because newly added claim 58 of this present application read upon all three embodiments of this application. Claim 58 is believed to be an allowable generic claim. Also, it is believed that any search with respect to one of the groups of claims would overlap into the categories of search for the other groups of claims, and thus, in the interest of overall efficiency on the part of the Office and part of Applicant and Applicant's Attorney, all the claims should most appropriately be examined together and issue in the same patent.

Notwithstanding the restriction requirement being traversed, Applicant has made its provisional election. Applicant respectfully requests that claims 23-57, reading upon Group II, namely the embodiments of Figures 15-57, and newly added claim 58 undergo early examination.

Allowance of the application is respectfully solicited.

Respectfully submitted,

H. Steve Ngo
